Biftek sa gorgonzolom / Steak with gorgonzola /	300g	3.400,00
Tartar biftek / Steak tartare/	300g	3.300,00

MESO POSLE ODLEŽAVANJA

Nakon procesa odležavanja junećeg mesa dolazi do sledećih, pozitivnih promena:

Gubitak tečnosti je ključni faktor kod odležavanja.

Komad obrađen nakon suvog zrenja može da izgubi i do 30% svoje prvobitne zapremine.

Najveće količine tečnosti se izgube u spoljašnjem sloju mesa, postanu potpuno suve i moraju biti odstranjene pre pečenja.

Omekšavanje mesa nastaje kada se prirodni enzimi aktiviraju i rastvaraju tvrda mišićava vlakna i vezivna tkiva.

Dobro odležalo meso je mnogo mekše nego sam sveži stejk.

Promena ukusa je uzrokovana mnogim procesima, uključujući i delovanje enzima i hranljivih bakterija.

Procesom suvog zrenja juneće meso poprima duboku, svojstvenu aromu.

BEEF AFTER DRY-AGING

When beef is properly dry-aged, it goes through some positive changes:

Moisture loss – The key to dry-aging. As it dries, the meat loses up to 30% of its original volume.

Most of the moisture is lost in the outer layer of the meat, which becomes tough and dry, so it's trimmed off before cooking.

More tender meat – Natural enzymes break down tough muscle fibers, making the steak much more tender than a fresh steak.

Change in taste – Thanks to the action of enzymes and beneficial bacteria, aged beef develops a deep, unique flavor.

ROŠTILJ / BARBECUE

	Količina Quantity	Cena Price
